Whether Elementary, Antimatter, and/or subatomic particles the entities of time and space are, electrostatic energy (+/-), and the magnetic properties of gravity.

When the two forces entangle, the reaction is light. Light is at the beginning of time and space and the creation of all matter/ mass. The structure of this is substance. With substance in the applications of the chemical elements of the material of all time and space.

This is a concept in theoretical physics into astro, nuclear, and quantum physics. The Quantum Grid Theory questions all of such that is known of the analogy and is the topic of Intel-Grid Publications.
